**Mike Ginni**

**MEDICAL BOARD OF CALIFORNIA – CONSUMER COMPLAINT;**

**Central Complaint Unit**

**1426 Howe Ave.**

**Sacramento, CA 95825**

RE: Medical Board Control Number: 05 2003152223

Dear Mr. Ginni;

Thank you for your ever informative and wonderful letter informing me that regardless of how bad I was serviced by a Dr. Timothy Sprague and Holy Cross hospital back in 1991, that I was nearly killed back then by this **Doctor on Drugs**, and because I didn't file my complaint within a seven year statute of limitations, I can just go a die a happy person.

Yes, I am (now) quite familiar with California's Business and Professions Code/Medical Practice Act. I have been through it extensively. I have also been through the final draft of AB2719 that was sponsored by Assembly Member Gallegos, that added 2030.5 to the code I previously referred to.

AB2719 – BAD legislation, sponsored by DEFECTIVE doctors and LAME state politicians.

I am through writing **anything** to the Medical Board of California, regardless of legislation, you are not here for the public. Almost killed once, and doing my best to avoid **death sentence #2**, and you're going to tell me I have no recourse as it was more than seven years after the incident – **you are wrong, wrong , WRONG Sir!**

I have a letter ready to be mailed to my Assemblyman, and have a draft in process for our new Governor. Perhaps scribble my name on a piece of paper you will keep, as you have not heard the last of me yet! And yes, your letter to me will be cc'd around the world! You are about to become a famous person, Sir, are you ready to defend this case on Fox News?

Bad legislation or not, I have a hospital and a doctor that need some corrective measures. Since you don't have the **spine** to do it, I will work from other angles.

You have not heard the end of 2030.5 and AB2719 that put this piece of **junk** in place. This just tells me there is much more to this "code" I need to look over closely, and pick to the bones! As I'm sure it contains more hidden issues to protect defective doctors and facilities, and perhaps 'DO NOTHING' agencies such as your.

Best regards,

-Pat
